

I'm not robot!

# DOCHERO

There is less number of people in the nuclear family and, therefore, less expenses. Suppose it brings a gift for your child, so it is also important to bring something as a gift for other children's children. People feel insecure in the nuclear family. One can be financially strong due to limited expenses. Instead of playing alone or immersing computer and CoMics games, which are very common among children in modern times, brothers and sisters could participate in a variety of traditional games such as the cliff of Hide and Seek or Blind Man In many parts of the world, families were more large in the past because people had more children. Additional expenses: When he lives in a community or in a joint family, then he has the responsibility of keeping him happy and familiar to you. In the joint family there is a close supervisory on the antisocial and non-social activities of the young member. Under the joint family system, the head of the family or karta is in total. For example, they could practice teamwork or leadership skills that are very necessary for their future jobs. Sometimes, due to open nature and ego, the struggle results in divorce or separation because there was no one to understand the basic concepts of the nuclear family. Avoid strim and discomfort: some people are emotional. It cannot have strong financial stability if it is the only person who is winning in a joint family. Get help with your essay if you need help to write your essay, our writing service of professional trials are here to help! Freedom Essay Drafting Service: the greatest restrict the young people who do not do certain tasks because they think this is not good for them. It is often badly tried by its mother in-law. They are those points that teach them the importance of the joint family and the disadvantages of nuclear families. Don't worry: if parents are working and and it suffered from any small or large disease, so one needs to deal with it alone since they have no elders and other family members to care for. They spend their time to eat, sleep and generate children. Each member of the joint family works according to the well-established socialist formula; Each one works according to her ability and conforms to their needs. Source of litigation: Sometimes the mixed system of the family encourages, litigation. They never feel overloaded. But, nuclear families have the advantage that if you live in comparison of those with whom you are very much then there is no need to take any stretch and their discomfort also fades in a moment. Disadvantages of the nuclear family while thinking about the advantages and disadvantages of the nuclear family, a person should also think that it is not always good to live in a nuclear family. It will always think that if you were in a joint family, this condition would never get up since you have other family members who can take care of the child and in the average time, you can do your job. As a result, unless the monthly salary of the support was high enough, they would not be able to make the aims. But today's generation is very intelligent. Work division: In a joint family each member receives work according to his ability. This is not necessary to acquire labor from outside the family. Socialism in wealth: according to Sir Henry The joint family of Maine is like a cooperative society with the father as the trust. To do this, you need to make some additional expenses. Since things are consumed in a large amount can be obtained at cheap prices. A social control agency: another advantage of the joint family is that it acts as a social control agency. But when they receive the same part of the cooked food in the common heart, some they can become lazy and can't feel the need to do anything, worked. For all these people the joint family acts as insurance Company. Instead, they want their freedom to do and achieve what they want in their life. Ease in motion: When you have a nuclear family, you face less problems while changing home. First, the family's financial situation could influence. At certain points, you realize the value of the joint family. In conclusion, although there were some inconveniences in terms of finance and spiritual life, to live in an extended family, I firmly believe that there were more points in their favor. Both male members and women divide household works and end in a short time spending the rest of the day in leisure. From culture to culture, the variance of the rmino can have different meanings. The married recipient and his wife barely have time to meet and speak rarely as a joint family. One is alone and feels more ill when he doesn't see anyone. At the time of the participation of movable or immovable property in the family dispute it is a serious proportion and most of the time are not resolved without the interference of the court. In addition, grandparents are more experienced than any other member, so they could become excellent advisors. You can handle your things according to you without disturbing other people's life. If there is an argument between the couple then there is no one to support any of them. For example, in a joint peasant family all members actively work according to their capacity. All men, women and children have to work. Money savings device: The joint family is advantageous from the economic point of view. Low position of women: under the joint family system, the woman is relegated to low condition.
